Build a three-dimensional model from a picture

NAME	DATE

1 **Activity · Work with your teacher**

Look at the blocks in the picture. Make the same shape with your blocks.

Build a three-dimensional model from a picture

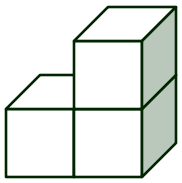

1. Builds it with all 3 blocks in the same places. Front row, from the left: towers 1 and 2 blocks high. The model may face another way on the table; a missing hidden block, or a block in the wrong place, is Not yet.

Practice / supporting evidence: This separately selected construction activity supports the Grade 1 composition line. It does not independently demonstrate every composition and decomposition action in the full statement.

Teacher procedure · Question 1

1. Give the child 7 blocks, all the same size.
2. Show the picture below, and leave it where the child can see it.
3. Say: “Make the same shape with your blocks.”
4. Do not help, point, or say how many blocks.

Record: Blocks used

Builds it with all 3 blocks in the same places. Front row, from the left: towers 1 and 2 blocks high. The model may face another way on the table; a missing hidden block, or a block in the wrong place, is Not yet.
