Compare two objects directly by one attribute

NAME	DATE

1 **Activity · Work with your teacher**

Here are two bags of rice. Which one is heavier? How do you know?

Compare two objects directly by one attribute

1. Compares them directly (holds one in each hand, or puts them on a balance) and says which one is heavier and which one is lighter. Answering from a look without comparing, or naming only one of the two, is Not yet.

Curriculum applications this task can record: Alberta Grade 1: Directly compare weight (additional context). Record the actual independent response and any separate actions; this does not establish the whole broader skill.

Broader skill evidence: No type-level Grade 1 decision has been recorded. No automatic skill credit.

Teacher procedure · Question 1

1. Give the child two bags of rice that are close in weight, so that looking is not enough.
2. Ask: “Which one is heavier? Show me how you find out.”
3. Then point to the other one and ask: “And this one?”

Record: The child did and said

Compares them directly (holds one in each hand, or puts them on a balance) and says which one is heavier and which one is lighter. Answering from a look without comparing, or naming only one of the two, is Not yet.
