Place value and number relationships

NAME	DATE

1 Write 248 in expanded form.

2 How many tens make 270?

3 Write these numbers in order from least to greatest: 914, 194, 491, 149.

4 These numbers count on by ones. What are the missing numbers, in order?

899		901	902	903	904	905		907		909

5 Is 18 even or odd?

○ Even, 18 ends in 8 ○ Odd, 18 starts with 1 ○ Odd, 18 ends in 8

6 Write the number seven hundred forty.

Place value and number relationships

1. 200 + 40 + 8

Evidence for the stated action: Checks the bounded response named here against the supplied problem. A single example does not certify the whole parent skill or outcome.

2. 27

Practice / supporting evidence: Does not independently produce regrouping or explain its conservation of value. The written main type or block-construction variant is needed to observe that action.

3. 149, 194, 491, 914

Evidence for the stated action: Checks the bounded response named here against the supplied problem. A single example does not certify the whole parent skill or outcome.

4. 900, 906, 908

Practice / supporting evidence: Completes or calculates from a supplied sequence; it does not establish the complete oral counting process or every skip-count interval.

5. Even, 18 ends in 8

Evidence for the stated action: Checks the bounded response named here against the supplied problem. A single example does not certify the whole parent skill or outcome.

6. 740

Evidence for the stated action: Checks the bounded response named here against the supplied problem. A single example does not certify the whole parent skill or outcome.
