

Writing and graphing inequalities

NAME	DATE	SCORE / 10
------	------	------------

Write or draw each inequality.

1 A child under 9 years old gets in free. Let a be the age, in years, of a child who gets in free. Write an inequality that shows this.

2 A bag can hold no more than 45 pounds. Let w be the weight in the bag, in pounds. Write an inequality that shows this.

3 A soccer team needs at least 14 players. Let p be the number of players. Write an inequality that shows this.

4 A child under 7 years old gets in free. Let a be the age, in years, of a child who gets in free. Write an inequality that shows this.

5 The temperature stayed above 10 degrees all day. Let t be the temperature in degrees. Write an inequality that shows this.

6 Draw the solutions of $-3 \geq x$ on the number line below.

7 Draw the solutions of $x < 3$ on the number line below.

8 Draw the solutions of " x is less than 4" on the number line below.

9 Draw the solutions of $x \leq -2$ on the number line below.

10 Draw the solutions of $x \geq 4$ on the number line below.

Writing and graphing inequalities

1 $a < 9$

4 $a < 7$

2 $w \leq 45$

5 $t > 10$

3 $p \geq 14$

6

A filled (closed) circle at -3 , and the line shaded, or an arrow drawn, from it to the left end. An open circle, or the shading to the right, does not count.

7

An open circle at 3 , and the line shaded, or an arrow drawn, from it to the left end. A filled circle, or the shading to the right, does not count.

8

An open circle at 4 , and the line shaded, or an arrow drawn, from it to the left end. A filled circle, or the shading to the right, does not count.

9

A filled (closed) circle at -2 , and the line shaded, or an arrow drawn, from it to the left end. An open circle, or the shading to the right, does not count.

10

A filled (closed) circle at 4 , and the line shaded, or an arrow drawn, from it to the right end. An open circle, or the shading to the left, does not count.
