

Find the area of a composite polygon by decomposing it

NAME	DATE	SCORE / 10
------	------	------------

- 1** The shape below is drawn on a grid. Each grid square is 1 unit long and 1 unit wide. What is the area, in square units, of the shape?

- 2** The shape below is drawn on a grid. Each grid square is 1 unit long and 1 unit wide. What is the area, in square units, of the shape?

3

The shape below is drawn on a grid. Each grid square is 1 unit long and 1 unit wide. What is the area, in square units, of the shape?

4

The shape below is drawn on a grid. Each grid square is 1 unit long and 1 unit wide. What is the area, in square units, of the shape?

5

The shape below is drawn on a grid. Each grid square is 1 unit long and 1 unit wide. What is the area, in square units, of the shape?

6

The shape below is drawn on a grid. Each grid square is 1 unit long and 1 unit wide. What is the area, in square units, of the shape?

7

The shape below is drawn on a grid. Each grid square is 1 unit long and 1 unit wide. What is the area, in square units, of the shape?

8

The shape below is drawn on a grid. Each grid square is 1 unit long and 1 unit wide. What is the area, in square units, of the shape?

9

The shape below is drawn on a grid. Each grid square is 1 unit long and 1 unit wide. What is the area, in square units, of the shape?

10

The shape below is drawn on a grid. Each grid square is 1 unit long and 1 unit wide. What is the area, in square units, of the shape?
