

Draw a shape with given attributes

NAME	DATE	SCORE
		/ 10

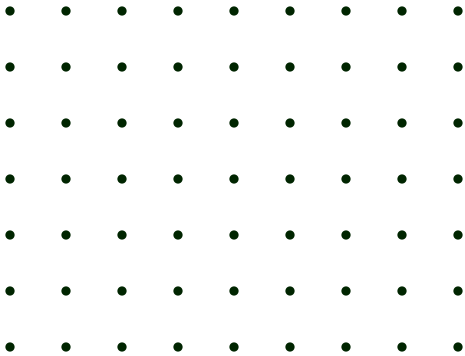

1

Use the dot paper below. Draw a shape with 3 sides.

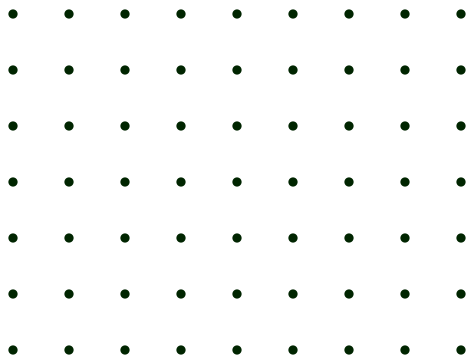

2

Use the dot paper below. Draw a shape with 4 sides and no right angles.

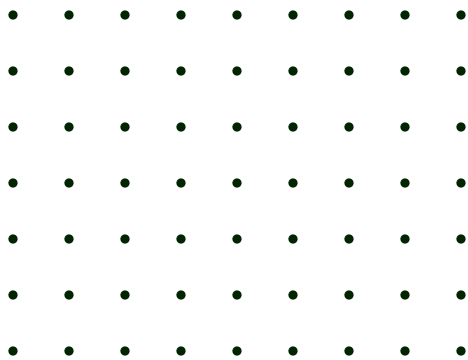

3

Use the dot paper below. Draw a shape with 4 sides that are all the same length.

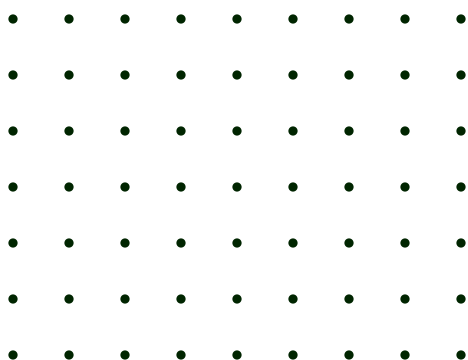

4

Use the dot paper below. Draw a shape with 8 sides.

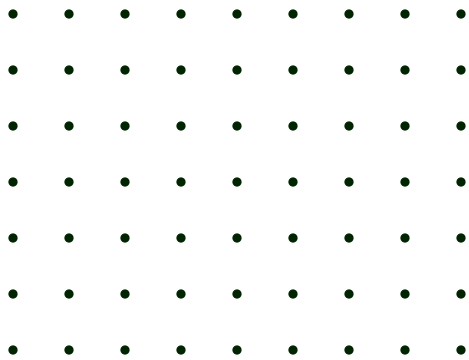

5

Use the dot paper below. Draw a shape with 3 sides and 1 right angle.

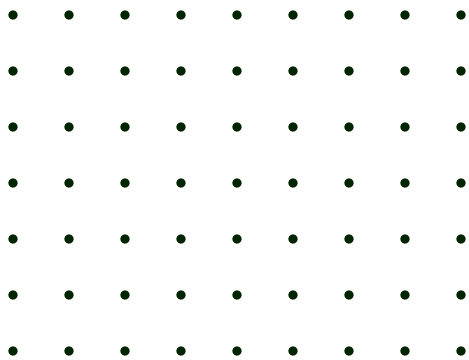

6

Use the dot paper below. Draw a shape with 4 sides and only 2 right angles.

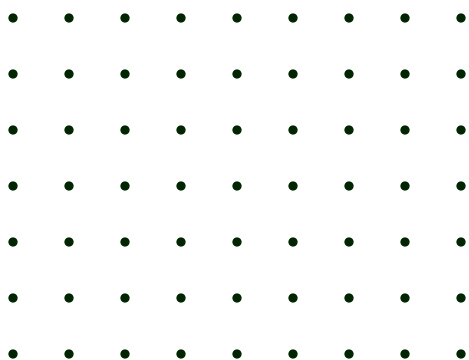

7

Use the dot paper below. Draw a shape with 3 sides and no right angles.

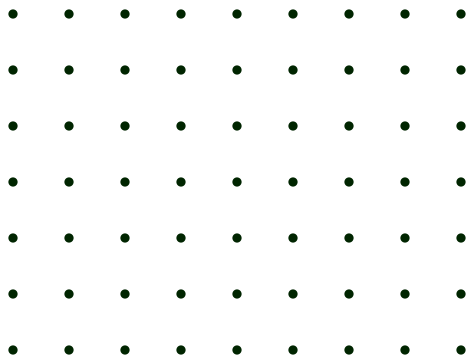

8

Use the dot paper below. Draw a shape with 4 sides and 4 right angles that is not a square.

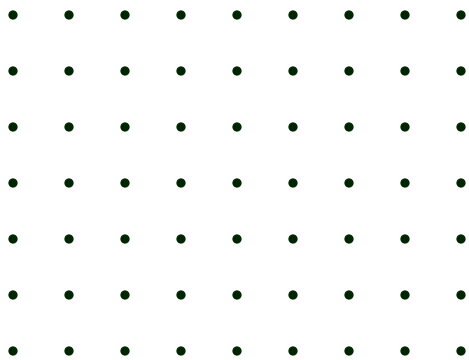

9

Use the dot paper below. Draw a shape with 4 sides.

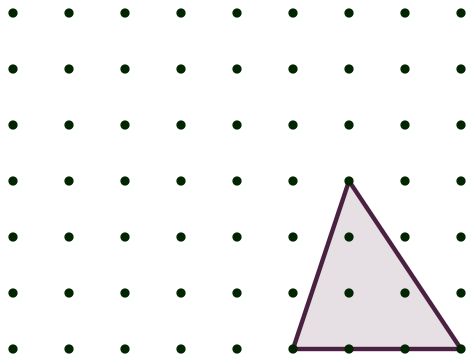

10

Use the dot paper below. Draw a shape with 4 sides and 4 right angles.

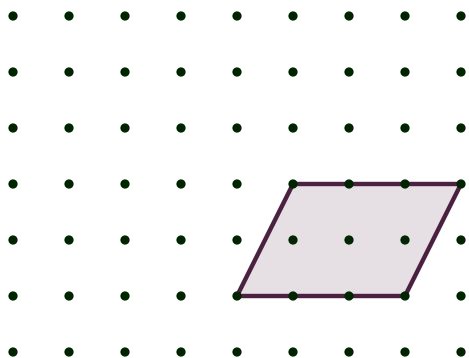

Draw a shape with given attributes

1 A drawing

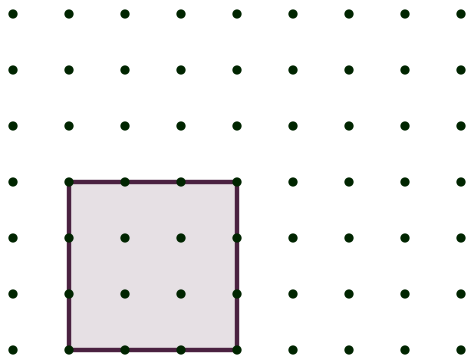

What counts as right: Any closed shape with exactly 3 straight sides and 3 corners (a triangle of any size or shape).

2 A drawing

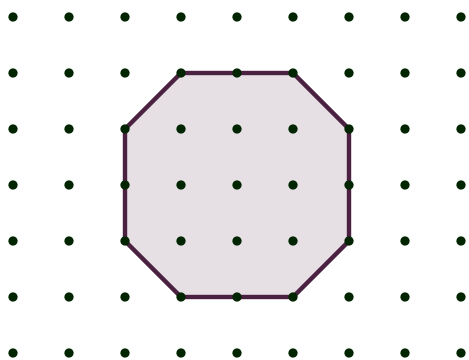

What counts as right: A closed shape with 4 straight sides where none of the 4 corners is square, like a slanted diamond or a leaning box shape.

3 A drawing

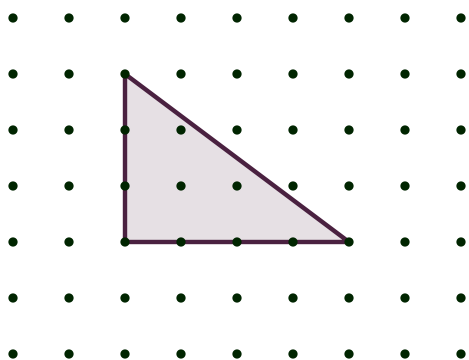

What counts as right: A square of any size, or a tilted square or other diamond whose 4 sides are all the same length.

4 A drawing

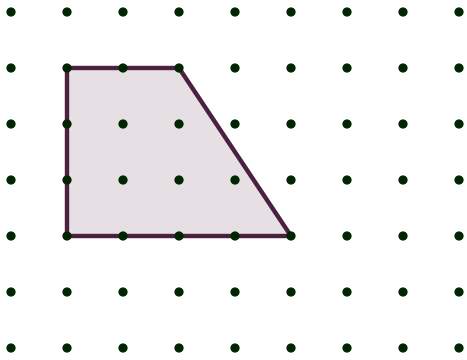

What counts as right: Any closed shape with exactly 8 straight sides and 8 corners. The sides do not need to be equal.

5 A drawing

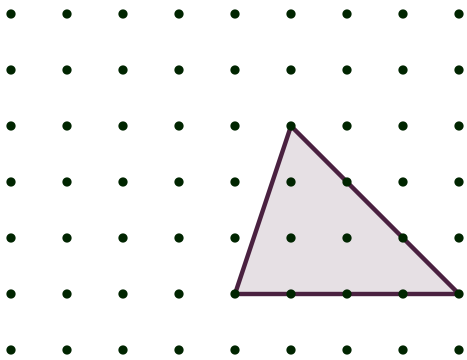

What counts as right: A closed shape with 3 straight sides and exactly 1 square corner (a right triangle). The other 2 corners are not square.

6 A drawing

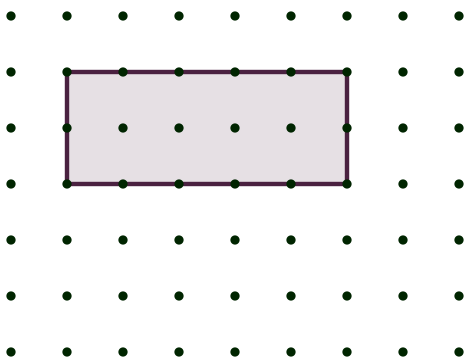

What counts as right: A closed shape with 4 straight sides where exactly 2 corners are square and 2 are not, like a trapezoid with one straight side up and down.

7 A drawing

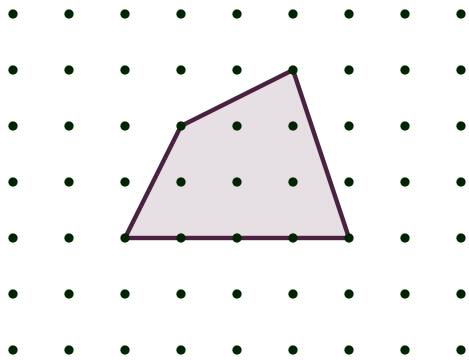

What counts as right: A closed shape with 3 straight sides where none of the 3 corners is square.

8 A drawing

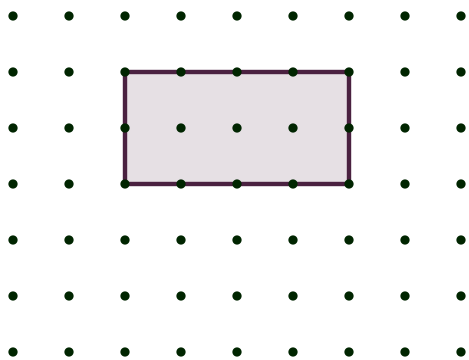

What counts as right: A rectangle with two long sides and two short sides, and 4 square corners. A square does not count.

9 A drawing

What counts as right: Any closed shape with exactly 4 straight sides and 4 corners. It does not need right angles or equal sides.

10 A drawing

What counts as right: A square or a rectangle of any size: 4 straight sides and 4 square corners.
